Bulk Migration Scheduling Tool: Output View - ACTL

0.1.1 Assigned ACTL

The Assigned ACTL field identifies the Central Office selected by the customer. The following rules apply:

	Field Name	Source	Error	Rule Text
1	Assigned ACTL	System Generated		Based upon the successful submission of a reservation, the Central Office is populated from the ACTL selected in the input drop down menu.
2	This field is a required output			

Bulk Migration Scheduling Tool: Output View – Bulk Cart

0.1.1 Bulk Cart Detail

The Bulk Cart Detail list section identifies the individual reservations for a single Bulk ID. The following rules apply.

	Field Name	Source	Error	Rule Text
1	**Bulk CART Detail:** IDLC 3/21/2004 27 lines CO Only 3/24/2004 34 lines IDLC 3/27/2004 10 lines **Total Lines : 71 lines**	System Generated based upon customer input		Based upon the successful ADD TO CART transaction, the specific information is listed in the BULK CART DETAIL section on the result side of the screen. On each specific reservation, the customer can remove it from the CART at any time. The ☒ represents the remove functionality needed. If the customer depresses the ☒, the transaction is removed from the BULK CART DETAIL. Each transaction needs to represent special handling and a total count will not appear until the submit button is depressed.
2	This field is a required output			

Bulk Migration Scheduling Tool: Reports

Report Outputs

This section identifies the reporting deliverables. The following reports are needed:

- Existing Bulk IDs Report – External and Internal Report
- Bulk ID Detail Report – External and Internal Report
